SHIFA TABASSUM

Agent Developer | AI Engineer

Hyderabad, India | shifatabassummd@gmail.com | +91-7075239810

LinkedIn: https://www.linkedin.com/in/shifa-tabassum | GitHub: https://github.com/shifatabassum418

PROFESSIONAL SUMMARY

Junior agent developer and AI engineer with an MCA background and a completed AI Specialist Program covering Generative AI, Agentic AI, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), and multi-agent systems. Generative AI Intern at Infotact Solutions, engineering a multimodal agent for UI self-healing and RPA, and intern at Full Stack Academy, Hyderabad. Hands-on with responsive web interfaces in HTML5, CSS3, JavaScript, and React.js, and Python-based AI/ML with NumPy, Pandas, Scikit-learn, and TensorFlow/Keras, plus LLM API integration and prompt engineering.

TECHNICAL SKILLS

Web Development: HTML5, JavaScript (ES6+), CSS3, React.js, Responsive Design, Semantic Markup, RESTful API Integration

AI/ML & Data Science: Python, NumPy, Pandas, Scikit-learn, Machine Learning Fundamentals, Convolutional Neural Networks (CNN), TensorFlow, Keras, Image Preprocessing, Model Training & Evaluation

Agentic AI & GenAI: RAG Pipelines, Model Context Protocol (MCP), Multi-Agent Systems, Prompt Engineering, LLM API Integration (OpenAI, Anthropic), AI Agent Design, Multimodal / Vision-Language Models

Automation & Testing: Playwright, pytest, UI Automation, RPA Workflows

Backend & Database: Node.js, RESTful APIs, MySQL, SQL

AI & Dev Tools: GitHub Copilot, ChatGPT, Claude AI, Cursor IDE, Bolt.new, v0.dev, Lovable, Git/GitHub, VS Code

INTERNSHIP EXPERIENCE

Generative AI Intern — Infotact Solutions — Present

- Engineering OmniSight, a multimodal Generative AI agent that integrates LLMs and vision-capable architectures to perform automated UI self-healing and dynamic RPA workflows.
- Owning the Python + Playwright browser automation module: scripted checkout flows and captured responsive screenshots at desktop, tablet, and mobile viewports, with pytest test coverage.
- Working in a four-member team, building the automation layer to integrate with the VLM, FastAPI backend, and dashboard modules.

Web Development Intern (JavaScript & React.js) — Internship Studio — Jan 2024 – Feb 2024

- Built responsive UI components (product listings, filters, detail pages) using HTML5, CSS3, JavaScript, and React.js.
- Wrote semantic, standards-compliant markup and integrated frontend with backend RESTful APIs; assisted in API testing and backend data handling.
- Used AI tools (ChatGPT, GitHub Copilot) for faster debugging, code suggestions, and resolving UI/functional issues.
- Collaborated in an agile environment using Git for version control.

PROJECTS

Deep Research Agent — Python, FastAPI, asyncio, Tavily, React, TypeScript, Tailwind CSS
GitHub: github.com/shifatabassum418/Deep-Research-Agent | Live: deep-research-agent-22a8.onrender.com

- Built a multi-agent system (planner, search, reader, fact-checker, conflict resolver, synthesizer) that turns a question into a citation-backed report; every claim is backed by a quote verified against its source.

Pharma Complaint Management System — Python, LangGraph, Groq, FastAPI, PostgreSQL, React, Redux Toolkit, Material UI
GitHub: github.com/shifatabassum418/aivoa-complaint-management-system | Live: aivoa-complaint-management-system-3.onrender.com

- Built a LangGraph pipeline that extracts complaint fields, scores risk, detects duplicates and suggests root cause and CAPA from emails or OCR-scanned PDFs; includes JWT auth, report export and Groq model fallback.

AI Phone Receptionist — Python, FastAPI, WebSocket, Edge TTS, Whisper STT, React, TypeScript, Tailwind CSS
GitHub: github.com/shifatabassum418/ai-phone-receptionist | Live: ai-phone-receptionist-k4tq.onrender.com

- Built a tool-calling voice agent that answers business questions and books, reschedules or cancels appointments with caller confirmation; swappable STT, LLM and TTS providers, human handoff and an admin dashboard.

NotebookLM Lite — Python, FastAPI, ChromaDB, PyMuPDF, fastembed, React, TypeScript, Tailwind CSS
GitHub: github.com/shifatabassum418/notebooklm | Live: notebooklm-rd53.onrender.com

- Built a RAG app where users upload PDFs and get answers grounded only in their documents, with clickable page-level citations that show the source page.

OmniSight (team project) — Python, Playwright, pytest, FastAPI, Vision-Language Models
GitHub: github.com/BoogeMan-lab/OmniSight

- Built the Playwright automation module of a multimodal UI self-healing and RPA agent: checkout flows tested on desktop, tablet and mobile with pytest coverage.

CERTIFICATION

Artificial Intelligence Specialist Program — Full Stack Academy, Hyderabad (Completed 2026). Topics: Generative AI, Agentic AI, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Multi-Agent Systems, AI Applications, Prompt Engineering. Currently interning at Full Stack Academy, applying these skills to live projects.

EDUCATION

Master of Computer Applications (MCA) — MESCO Institute of Management and Computer Sciences, Osmania University — 2023 – 2025

B.Sc Computer Science — Osmania University — 2020 – 2023
